

PROFIN ALUMINIUM PROFILES

- Horizontal & Vertical Gola Profiles
- Stack Modular Shelving

- Rail Door Profiles
- Strike Shelving System

PROFIN RANGE OF ALUMINIUM PROFILES

Gone are the days when kitchens had dedicated rooms which were only used for daily chores like cooking and washing. With the on-going migration into urban centres the concept of micro-living as a trend is now gaining importance among city dwellers. Separating walls disappear, living spaces merge. These spaces flow into each other and therefore integrating family and living space with kitchens remains a very popular design option especially in upcoming cities.

An open kitchen layout comes with multiple advantages. It transforms your kitchen into the pulsating hub of your home enabling easy conversations between your guests and you as you cook and prepare dishes. It also adds a sense of volume to your kitchen. With this layout the kitchen and its cabinetry need to not only look immaculate but should also carry an individualistic appeal which blurs the lines of distinction between your living spaces. Häfele presents *Profin* - a new comprehensive range of state-of-the-art Aluminium Profiles that helps you achieve all this and much more. The range consists of four different categories of profiles – *Gola Profiles, Stack Modular Shelving, Rail Door Profiles and Strike Shelving System.* These categories exploit an individual's sense of sophistication by proposing exciting design potentials and flawless integration. These profiles are manufactured using advanced technology with meticulous precision that augments user-friendliness and ensures utmost ease of installation.

FINISHES:

The Profin Range of Aluminium Profiles and their accessories, across categories, are available in five contemporary finishes - Silver, Graphite, Gold, Rose Gold and Dark Bronze. Whether you opt for a dark kitchen or follow the recent trend of adapting metallic hues, our versatile range of profiles blends in perfectly with all colour schemes. When used in contrast, they stand out like jewelled embellishments that radiate across the kitchen.

PROFIN: ONE RANGE. MANY SOLUTIONS.

GOLA PROFILES

For Handle-less Furniture Application

Extensive surfaces, straight-cut designs and handle-less fronts – these furniture developments are trending. Häfele's Profin Range of Aluminium Profiles offers its diverse assortment of Gola Profiles which, thanks to its versatility, makes it possible to satisfy every aesthetic and construction need of contemporary kitchens. You can achieve a seamless handle-less kitchen cabinetry construction with our new Horizontal and Vertical Gola Profiles. The installation of these profiles is extremely simple and easy due to the inventive fastening system.

VERTICAL GOLA PROFILE

Oven Protector for Side & Intermediate Vertical Gola Profiles

Article no.	126.36.218	126.36.219	126.36.220	126.36.221	126.36.217		
Finish	Silver	Graphite	Gold	Rose Gold	Dark Bronze		
Material	Aluminium	Aluminium					
Length	580 mm	580 mm					
Purpose	Prevents accidentally dislodging the built-in oven / microwave from its place						
MRP (INR)	2,900/-	2,900/-	4,400/-	4,400/-	4,400/-		

Unit: Piece

Brackets for Side and Intermediate Snap-on Vertical Gola Profile

For Side Snap-on Gola Profile

Note: The fixing of these brackets is on the front edge thereby eliminating the need of internal screwing and providing cleaner aesthetics inside the cabinet.

Article no.	126.37.965	126.37.966		
Application	For Side Snap-on Vertical Gola Profile	For Intermediate Snap-on Vertical Gola Profile		
Material	Plastic			
Purpose	Enables easy installation as the profiles simply snap into the brackets – no screwing required			
MRP (INR)	250/-	250/-		

VERTICAL GOLA PROFILE

Rear Brackets for Side and Intermediate Snap-on Vertical Gola Profile

Article no.	126.37.967
Material	Steel
Purpose	These brackets together with the brackets for Snap-on Gola Profiles help maintain a uniform gap between two cabinets or help support the side panel (need to be installed horizontally)
MRP (INR)	400/-

Unit: Pair

INSTALLATION

HINGE INSTALLATION DETAILS

- The gap between holes for installing a Cross Mounting Plate and Straight Mounting Plate should be 37 mm and 20-22 mm respectively from the front of the unit
- Hinges with Cross Mounting Plates should hence always be used with Gola Profiles
- Straight Mounting Plates can only be used on side panels without a Gola Profile

STACK MODULAR SHELVING

For Decorative Open Shelving System

A new design concept of open shelving / cabinet systems is emerging. More and more enclosed storage areas in the kitchen seem to be fading into this new design concept. The open spaces are increasingly being used as platforms to showcase kitchenware, curated statement pieces of art or accessories.

Häfele presents its Profin Range of Stack Modular Shelving Profiles that shapes your entire furniture aesthetics while silently delivering strength, stability and function to the units. These profiles and their accessories enable construction of open shelves with glass or wood and emanate elegance with their sleek and faultless built and finish.

H. Gasket for Glass Shelves

Article no.	793.10.980	793.10.981	
For Glass Thickness	4mm	6mm	
Material	Rubber		
MRP (INR)	175/-	175/-	

Unit: 1 Meter

DRILLING DETAILS

For Lateral and Universal Profile

For Vertical Profile

By Drawing

K = 8.7 mm with an end cap at the top K = 9.7 mm without an end cap at the top

By Template

Step 1 : Position the template on the profiles

Step 2: Mark the holes, remove the template, drill the profile.

MOUNTING & CONSTRUCTION DETAILS

For Freestanding Application

We recommend the use of levelers for a freestanding application. In this case, to install the leveler, thread a M10 hole with a 30 mm depth into the lower part of the vertical profile.

CALCULATIONS

For Glass / Wood

- Shelf Depth = Structure Depth 42mm
- Shelf Width = Structure Width 42mm

Note: The Stack Profiles give you the freedom to design the structure as per your requirement, with no depth, height or width restrictions. It is therefore not possible for us to ascertain the maximum weight carrying capacity. This needs to be determined by the fabricator depending on the dimensions of the structure. These Profiles are not meant for heavy shelving.

For Wall Mounting Application

Method 1

Drill holes of Ø 4.5 mm on the vertical profile in the position demonstrated in the drawing. The type of hole to be drilled depends on the fixing screw - Type A or Type B (details on the next page).

- Mark the height on the wall from the floor, where you want to mount the structure
- Mark the fixing axis and the hole pitch
- Drill holes into the wall

STACK MODULAR SHELVING

DRILLING DETAILS

Type A - Countersunk Hole

- In Type A, the countersunk screw secures the structure to the wall and flushes in line with the profile
- The screw head will be visible
- No adjustments are possible

Type B - Double Diameter Hole

- In Type B, a through hole of diameter 4.5 mm is drilled into the profile. Another hole of diameter 8 mm with a depth of 6.5 mm is drilled into the front part of the back vertical profile
- The dome-head screw passes through the bigger hole into the diameter 4.5 mm hole and secures the structure to the wall
- The screw head will not be visible (if a cover cap is used to conceal the diameter 8 mm hole)
- · Adjustment of 1 mm will be possible

Method 2

- Thread the Vertical Profile from the top to a height of 40 mm
- Cut an oval hole as per the dimensions provided in the diagram

- Drill holes in the wall using a diameter 6 mm drill bit to a minimum depth of 40 mm
- Insert the dowels (not included in the offering) in the holes drilled
- Fix the curved hooks (not included in the offering) into the dowel

- Bring the assembled structure close to the wall and engage it with the curved hooks
- Once the structure is engaged with the hooks, adjust it to the desired height (can be adjusted to + / 5mm) and insert the grub screws (not included in the offering) along the threaded rear vertical profiles from the upper side via a hexagonal wrench to tighten the grip and hold the hooks firmly in place

 Once hooked firmly, secure the structure to the wall with a normal screw through the hole (Type A or B) made in the universal profile

RAIL DOOR PROFILES

Decorative Cabinet Doors

Overhead cabinets and tall units are a must in any kitchen, especially in an open kitchen. These systems optimally utilize spaces available within kitchens and can effectively store bulk quantities of food (non-refrigerated) and other kitchen items in an organized way. To impart a similar grace to these systems as your handle-less furniture and open shelving units, Häfele brings to you its Profin Range of Rail Door Profiles. These profiles meander naturally forming innate grooves for the handles and border the glass to perfection thereby crafting timeless designs that never run out of fashion.

MRP (INR)	5/-	5/-

Unit: Piece

E. 90° Connection Screw

Article no.	563.97.991	563.97.992
Finish	Zinc Plated	Darkened
MRP (INR)	7/-	7/-

Unit: Piece

INSTALLATION

For 90° Connection

- Cut the thick door profile to desired length Length of the thick profile = Door length –
- Insert a 4 mm glass panel into the profile
- Using the 90° connection screws, fix the thin door profile to the thick door profile $\,$
- Fix the handle

For 45° Connection

- Mitre the thick door profiles and cut them to the desired length
- Insert the 45° connector and using the screws build the frame on three sides
- Slide in a 4 mm glass panel into the profile 3.
- Enclose the glass by adding in the profile on the fourth side and fixing it in place with the connector and screws
- Fix the handle

GLASS SIZE CALCULATION

For 90° Connection

- A1 = A-13
- B1 = B-102

For 45° Connection

- A1 = A-102
- B1 = B-102

STRIKE SHELVING SYSTEM

Decorative Shelves

What's on the inside is as important as what lies on the outside. Häfele introduces its Profin Range of Strike Aluminium Profiles for shelves inside cabinets and tall units. These profiles are a brilliant way to complete the look of your interiors and add ambience, functionality and style to your furniture. The front profile, designed with modularity in concept, includes a groove to include LED strip lights which help illuminate the insides of the cabinet with indicative and directional lighting. These lights can be combined with drivers and sensors so that every time the shutter opens, the lights inside switches on.

KIT 1: You should order KIT 1 when you use the Front Open Profile together with the Rear Closed Profile. The KIT 1 consists of:

- D. Rack Inserts (4)
- E. Rear Connectors (2)
- F. Front Connectors (2)

KIT 2

KIT 2: You should order KIT 2 when you use the Front Open Profile in the front as well as at the back (instead of a Rear Closed Profile). The KIT 2 consists of:

- D. Rack Inserts (4)
- F. Front Connectors (4)

APPLICATION

- 1 Strike shelf with Front Open Profiles in the front and at the back. For this application, KIT 2 needs to be ordered
- 2 Strike shelf with Front Open Profile in the front and Rear Closed Profile at the back. For this application, KIT 1 needs to be ordered

Note: We recommend using the Front Open Profile with the Rear Closed Profile for a clean aesthetic look.

Auttalaura	126.36.216	126.36.215	
Article no.	KIT 1	KIT 2	
Application	Strike shelf with Front Open Profile in the front and Rear Closed Profile at the back	Strike shelf with Front Open Profiles in the front and at the back	
Consists of	2 × Rack Inserts 2 × Front Connectors 2 × Rear Connectors	2 × Rack Inserts 4 × Front Connectors	
Finish	Grey		
Material	Plastic		
MRP (INR)	250/-	250/-	

Unit: Kit

G. Shelf Support

Article no. 282.43.750			
Finish	Nickel Plated		
Material	Steel		
MRP (INR)	90/-		

Unit: Piece

WEIGHT CARRYING CAPACITY DETAILS

Note:

- The weight carrying capacity is for reference purposes only and is limited to a shelf depth of 500 mm only
- The weight capacity includes the weight of the hardware as well as the weight of the shelf

CALCULATIONS

For cutting the Strike profiles

- Front Open Profile = Internal Cabinet Width (Lm) 2 mm
- Closed Rear Profile = Internal Cabinet Width (Lm) 34 mm
- Lateral Profile = Internal Cabinet Depth (Pm) 26 mm

For glass dimensions

- Glass Width = Total Width of Shelf (Ls) 2 mm
- Glass Depth = Total Depth of Shelf (Ps) 13 mm

LED STRIP LIGHTS CONFIGURATION

Note: Please refer to the Häfele Loox Lighting Catalogue for choosing the appropriate LED Strip Lights, Drivers, Sensors, Transformers etc.
